BOHEMIA SPORT ^{LION}

BOHEMIA SPORT is a brand with strong roots in Czech and European market since 1928. Our main product in the present is our wooden deckchairs made out of high quality beech wood. Our complete assortment includes stools, chairs, flags, sledges, hockey sticks and wooden briquettes.

Carpenter, printing, sewing and assembly workshop in one company ensures minimal time of realization. We focus on high quality, professional customer service and upholding agreed dates.

Our products are certificated and they are produced with applicable standards. Cooperation with our company is comfortable and creative, so we can produce the best quality products.

Options of printing

without print

one color cover
color selection (the swatch)

thermal transfer print

own design
appropriate for logo of company

sublimation print

full-surface printing
photorealistic printing
own design
two-sided printing

thermal transfer print

Transfer printing, or thermal transfer printing, is a method of non-direct printing. With this method, the transfer medium – paper or transfer foil – is first printed and only then this print is transferred to promotional textiles under pressure and high temperature in the thermopress. Its smooth surface ensures accurate color printing on the lounger and achieves excellent print quality for your theme.

Sublimation print

Direct and indirect printing with sublimation inks. Direct textile printing is directly printed with sublimation inks and then the colors are fixed in the fusing unit. Indirect printing - first the paint is printed on transfer paper, and then ironed on textiles on a rotary press. The paint from the paper is sublimated into the textile and thus dyes it in depth.
